Macroeconomic & Corporate News

US aid to Jordan totals \$1.3billion in 2017

Prime Minister Hani Mulki on Tuesday met with a delegation of US congressional aides to discuss Washington's assistance to Jordan, the Jordan News Agency, Petra, reported. During the meeting, Mulki stressed the strategic partnership between Jordan and the US, expressing appreciation for Washington's support for the Kingdom, which, he said, helps reduce the pressure on the national budget and allows the implementation of development projects. The prime minister outlined the repercussions of the regional instability resulting from the Syrian crisis, especially the hosting of 1.3 million Syrians, which has put significant strain on the Kingdom's resources and state budget, along with the education, health, and infrastructure sectors, apart from military and security burdens.

Planning Ministry, Arab fund sign \$46m loan agreement

The Planning and International Cooperation Ministry on Thursday signed a soft loan agreement of \$46 million with the Arab Fund for Economic and Social Development to contribute to establishing the Salt ring road. The loan will finance the eastern part of the project, the Jordan News Agency, Petra, reported. The ministry expects the agreement to be presented to the fund's board of directors in late May and finally endorsed in early June, before procedures to implement the scheme commence.

UAE denies lifting ban on import of vegetables, fruits from Jordan

The Ministry of Climate Change and Environment, MoCCaE, has denied rumours circulating on Jordanian media outlets with regards to the UAE's lifting of the ban on imports of certain vegetables and fruits from the Kingdom of Jordan, saying that no decision has been issued in these regards by the UAE. Last month, the Ministry announced a decision to ban imports of vegetables and fruits from selected countries with effect from May 15th, 2017, as those products have been found to contain pesticide residues in excess of permissible limits. The countries impacted by the ban include Jordan, Egypt, Oman, Lebanon and Yemen. These countries have been asked to provide a certificate of analysis of pesticide residues for all other vegetables and fruits stating that they are free of such residues as of May 15th, 2017.
